

Jaya Krishna Polaki

Java Backend Developer | Spring Boot | REST APIs | B. Tech CSE 2026

polakijayakrishna@gmail.com | +91-9381743787 | [Linkedin](#): JayaKrishna Polaki | [GitHub](#): PolakiJayaKrishna | Bengaluru, India

PROFESSIONAL SUMMARY

B. Tech CSE graduate (2026) specializing in Java backend development with Spring Boot 3, JWT, REST APIs, and AWS EC2. Built and deployed ResumeRadar — a live AI-powered ATS analyzer — featuring async processing, JWT security, CI/CD via GitHub Actions, and Docker. Ready to contribute to scalable, production-ready backend systems.

WORK EXPERIENCE

Digital Interaction Advisor

[24]7.ai | Bengaluru | Feb 2026 – Present

- Resolved customer issues in a high-volume 24/7 environment, demonstrating clear communication, patience, and structured problem-solving.

TECHNICAL SKILLS

Languages & Databases: Java 21, SQL, PostgreSQL, MySQL

Frameworks & Testing: Spring Boot 3, Spring Security (JWT), Spring MVC, Spring Data JPA, Hibernate, REST APIs, JUnit 5, Mockito

Tools: Git, GitHub, Docker, Maven, Postman, Swagger (OpenAPI), IntelliJ IDEA, AWS EC2, Linux (Ubuntu)

Concepts: OOP, MVC Architecture, Exception Handling, API Design, Database Design, Asynchronous Processing, Cloud Deployment

PROJECTS

ResumeRadar – AI-Powered ATS Resume Analyzer

Live API (Swagger): [\[AWS\]](#) GitHub: [\[GitHub\]](#)

Tech: Spring Boot 3, Java 21, Spring Security (JWT), MySQL, Google Gemini AI, Apache PDFBox, JUnit 5, Mockito, AWS EC2

- Architected an asynchronous ATS scoring API using Java 21 and Spring @Async, integrating Google Gemini LLM to analyze PDF resumes in background threads and return instant HTTP 202 responses, fully decoupling processing from client wait.
- Secured all REST endpoints with stateless JWT authentication and centralized exception handling via @RestControllerAdvice, ensuring consistent JSON error payloads across the entire API surface.
- Containerized with Docker Compose and built a GitHub Actions CI/CD pipeline for zero-touch automated deployments to AWS EC2 on every main branch push.
- Achieved comprehensive service-layer coverage using JUnit 5 and Mockito, validating core business logic, edge cases, and data integrity scenarios.

Employee Leave Management System (ELMS)

GitHub: [\[GitHub\]](#)

Tech: Spring Boot 3, Java 21, Spring Security (JWT), PostgreSQL, JPA/Hibernate, JUnit 5, Mockito, Docker

- Built a secure REST API with JWT authentication and role-based access control (Admin, Manager, Employee) for managing leave requests and approvals.
- Implemented JUnit 5 and Mockito tests covering success, missing user, and insufficient leave balance scenarios to harden core business rules.
- Containerized the service with Docker and deployed it with PostgreSQL persistence, enabling isolated local development and reliable test environments.

EDUCATION

Kalasalingam Academy of Research and Education, Tamil Nadu

Sept 2022 – May 2026

Bachelor of Technology in Computer Science and Engineering **CGPA: 7.68**

Kakaraparti Bhavanarayana College

Sept 2020 – May 2022

Intermediate (MPC) **Percentage: 75**

CERTIFICATIONS

- Design and Analysis of Algorithms – CodeChef
- Database Management Systems – CodeChef
